## DEAY ENDOTRACHEAL TUBE

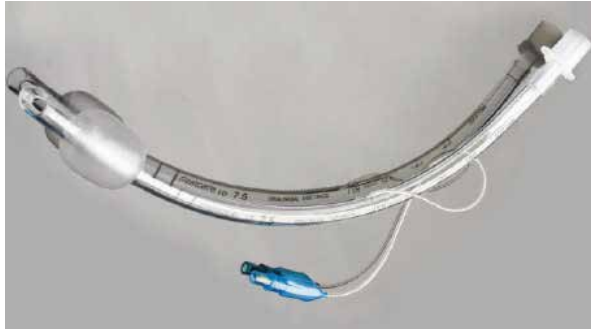

**Deay has an Endotracheal Tube for Every Need.** Deay's high-quality, cost-effective endotracheal tubes are available in a variety of sizes to fit a wide range of applications. Tubes are available with or without a high-volume, low-pressure cuff. You don't have to sacrifice quality patient care to reduce your supply costs.

**Long cuff length reduces damage** on the tracheal wall by distributing pressure over a large surface area. Smooth, frosted cuff conforms to the trachea to form a leak-free seal with minimum tissue trauma. Marked Pilot Balloon. Clearly marked tube size and manufacturing batch number allow immediate identification. Balloon is highly sensitive to change in cuff pressure, permitting accurate monitoring. Bull-Nose Tip, Short, smooth tip minimizes contacting tracheal mucosa and lessens the trauma of intubation. Smooth Murphy eye, Polished to ensure atraumatic intubation and extubation. Intubation Guide, Easy-to-read, marks assist in tube placement. Thermosensitive tubing material, PVC tube softens at body temperature to conform to the shape of the trachea, yet remains kink-resistant for patient safety. Connects smoothly to main tube for maximum patient comfort.

**Full-Length Split-Resistant, Radiopaque Strip, High radiopacity** aids verification of intubated position. Split-resistant to keep tube intact when cut.

## Endotracheal Tubes

Endotracheal Tube, Cuffed

### Endotracheal Tube, Cuffed

#### High-Volume, Low-Pressure Cuff

Manufactured with strong tube walls to ensure the proper ventilation for all patients. A variety of sizes ensures a safe airway is maintained throughout the surgery.

- High-volume, low-pressure, barrel-shaped cuffs.
- Responsive pilot balloons.
- Finely heat-welded cuffs (cuffed versions).
- Bull-nose tips.
- Split-resistant radiopaque lines.
- Smooth Murphy eyes.
- Kink-resistant thermosensitive tubes.

## Endobronchial Tube

Tracheobronchial Tube

### Tracheobronchial Tube

- Use for one-lung ventilation, in the OPS of bronchus, thoracic surgery and so on.
- Made of medical grade PVC, transparent, soft and smooth.
- Available with left-sided and right-sided.
- Different side of tubes distinguished by two different cuff.
- Equipped with two suction catheters, one stylet and one switch connector.
- Easily operate one-lung ventilation by switch connector.

Left and right sided size: 28Fr, 32Fr, 35Fr, 37Fr, 39Fr, 41Fr.

Endobronchial Blocker Tube

### Endobronchial Blocker Tube

Endobronchial Blocker Tube is designed to differentially intubate a patient's bronchus in order to isolate the left or right lung for procedures that require one-lung ventilation.

- Size 5fr, 7fr, 9fr meeting clinical needs, for all patients from pediatric to adult.
- Ultrathin cuff is made from PU in medical grade, thickness 0.028mm, comfortable and soft. It creates a superior seal and reduces microaspiration, when deflated it is very close to blocker tube, so it can pass ETT easily.
- Twist lock design, easy operation, secure locking.

## Suction Catheter

Suction Catheter

### Suction Catheter

- Made of non-toxic PVC.
- Atraumatic, soft and rounded open tip with two lateral eye.
- Soft and kink resistant PVC tubing.
- Colour coded connector for easy identification of size.
- Extra smooth low friction surface tubing facilitates easy intubation.
- With X-ray or without X-ray.
- An option of transparent or frosted tubing.

Size: 5, 6, 8, 10, 12, 14, 16, 18, 20, 22, 24Fr/Ch.

Item No.:	Description:
DM1021	with Control Valve Connector
DM1022	with Y Connector
DM1023	with Pipe Connector
DM1024	with Straight Connector
DM1025	with Funnel Connector(A / B)

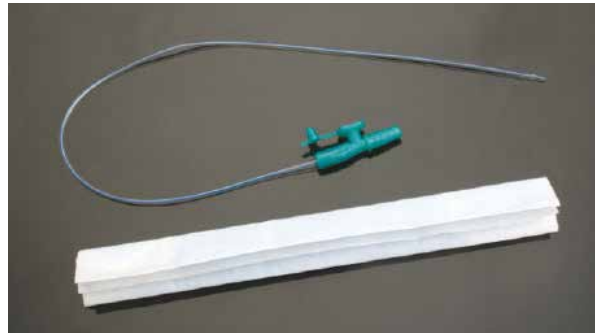

Vertical Strips Suction Catheter

### Vertical Strips Suction Catheter

- Six kinds of connector available with control valve connector, with Y Connector, pipe connector, straight connector, funnel connector.
- Color coded for size identification.
- Vertical strips on the surface will avoid sticking to the wall of the tube, which will solve the suction problem completely.

Size: 6, 8, 10, 12, 14, 16, 18, 20 Fr / Ch.

Infant Mucus Extractor

### Infant Mucus Extractor

- Suitable for obtaining mucus specimen for microbiological examination.
- Also suitable for aspiration of secretion from Oropharynx of new born babies to ensure free respiration.
- An option of transparent or frosted tubing.
- Atraumatic, soft and rounded, open tip with two lateral eyes.
- Clear transparent container permits visual examination of aspirate.
- Spare screw top lid is provided to seal the container for safe transportation of specimen to the laboratory or aseptic disposal of container.
- Also available with Bacterial barrier filter at suction end.
- Suction tube lengths available.

Size: 6, 8, 10, 12, 14, 16, 18, Fr/Ch.

Item No.:	Capacity:
DM1027	25ml

# Suction Connecting Tube / Yankauer Handle

Suction Connecting Tube

## Suction Connecting Tube

Item No.: DM1028

- Made of high density and non-deductive pvc material.
- With superior draping quality while maintaining.
- During suctioning, each end has universal female connectors for convenient and secure attachment.
- Most sizes have straight male connector included.
- Different type of connector are available.

Size: 3/16" \* 1.8m, 3/16" \* 2m, 3/16" \* 3m, 1/4" \* 1.8m, 1/4" \* 3m etc.

Aero Chamber for asthma treatment / Aerochamber with silicone mask

### Aero Chamber For Asthma Treatment / Aero Chamber with Silicone Mask

This product is a spacer for aerosol to be used with Metered Dose Inhalers for treatment of asthma.

#### Features:

- Helps target medicine to your lungs.
- Helps keep you from spraying drug on the back of your throat.
- Clear mouthpiece helps caregiver to see valve movement to coordinate timing of medication actuation.
- Valve and end cap remove easily for cleaning, and the valve can be replaced, so your chamber lasts longer.
- Helps eliminate unpleasant tastes of some medications.
- Detachable masks allow children to switch to the mouthpiece at as young an age as possible, for better drug delivery, without the cost of buying a new chamber.
- Available in different colors.
- Suitable for infant, baby, child and adult.

Respiratory Exerciser

### Respiratory Exerciser

Ref. No: DM103501

#### How to use:

1. Hold the unit in an upright position.
2. Exhale normally and then place your lips tightly around the mouthpiece at the end of the tubing.
3. Low flow rate – Inhale at a rate to raise only the ball in the first chamber. The second chamber ball must remain in place. This position should be held for three seconds or as long as possible whichever comes first.
4. High flow rate-Inhale at a rate to raise the first and second chamber balls. Ensure that the third chamber ball remains in the rest position for the duration of this exercise.
5. Exhale-Take out the mouthpiece and exhale normally. relax(Repeat)-Following each prolonged deep breath, take a moment to rest and breathe normally. This exercise can be repeated according to physician's instructions.

**Note:** Tilting the unit forward can make the respiratory exerciser easier for patients who find it different to raise the ball or balls while holding the unit in an upright position.

# Emergency Manual Resuscitator

Silicone Resuscitator

## Silicone Resuscitator

The Silicone resuscitator is intended for pulmonary resuscitation for neonates through to adult.

### Features:

- Silicone resuscitator (except mask, oxygen tubing and reservoir bag) can be autoclaved repeatedly at 134 degree celsius.
- It is semi-transparent and come with a pressure limitation valve for patient safety.
- A textured surface ensuring a firm grip and providing effective ventilation. Patient connector is 22/15mm.
- 100% latex free.

### Accessories:

Silicone mask, oxygen tubing, reservoir bag.

## CPR Mask

CPR Mask

### CPR Mask

Item No: DM1046

The CPR mask is designed to provide protected rescue breathing for any patient and may also be used with a resuscitator. It helps protect rescuers in an emergency situation.

#### Features:

- It is unfoldable.
- Prevents direct contact during artificial respiration.
- Transparent dome allows rescuer to visually check for patient's lip colour and vomitus.
- Made of durable plastics for easy cleaning and long product life.
- Latex free.
- Optional accessories: alcohol pad, PVC glove.

# DEAY UROLOGY

Smooth tapered tip of catheter facilitates introducing into the urethra.

The drainage eyes are accurately formed to permit effective drainage.

The symmetrical balloon expands equally in all directions so as to perform its function of retaining bladder efficiently.

The smooth outer surface is specially treated with medical grade silicon fluid which facilitates passage through urethra.

Color Coded sleeves are useful for easy and rapid size identification.

Plastic valve permits simple use of all common used type of syringe nozzles for easy inflation / deflation and are proved to be more efficient than Rubber valve.

1. Catheter balloon have been individually inflated and checked for material integrity, symmetry and the inflation/deflation system integrity to ensure the perfect functioning.
2. Silicone coating gives an unmatched smooth finish for trauma-free catheterization and high degree of patient comfort .
3. The non-return valve makes syringe insertion easy and trouble-free.
4. Extremely flexible, easy-to-bend in any direction, and the taperless shaft conform to the patient anatomy. Constructed with large circular drainage lumen, which achieve maximum and effective urine flow.
5. Inflation lumen is built-in to avoid interior or exterior protrusion thereby, allowing the catheter to bend in any direction.
6. Elliptical side eyes feature a special beveled edge, it not only improving smoothness and reducing trauma, but also giving maximum fluid flow.

# All Silicone Foley Catheter

## All Silicone Foley Catheter

- Medium length round tip with two opposing eyes.
- Maximum softness and biocompatibility for enhancing patient comfort.
- Technically advanced process makes the balloon an integral part of the tip.
- No "glue" ridge to irritate the urethral upon insertion and removal.
- Remarkably smooth, the non-stick surface of silicone makes it highly resistant to encrustation.
- The shaft allows for an approximately 30 % larger lumen, which can permit longer use and promote better drainage of sediment and blood clots.
- The ribbed funnel ensures an easy, leak-proof connection while the clear connector and clear shaft allows, visual examination of drainage.

Auto Disable Syringes

## Auto Disable Syringes

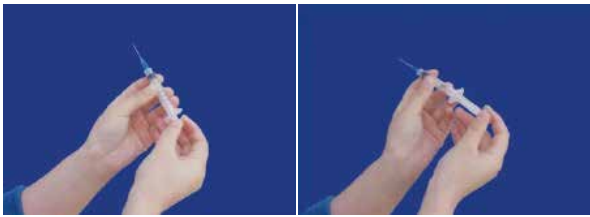

Item No.: DM0006

- Main structure of sterile auto disable syringe for single use: RPF, barrel, plunger, piston and its barrel and piston are in interference fit, so as to make sure of seal.
- RPF: Such syringe has been in a design that RPF will start all by itself just it has been used in order to prevent if from reusing.
- Barrel of the auto disable syringe is transparent to observe solution and read its measure through surveyor's rod graduation on it. And its top is designed as RPF area.
- Both barrel and plunger of the auto disable syringe are made from biomedical polymer material whose biocompatibility conforms to standards.
- Model of auto disable syringe: luer slip, luer lock.

## Hydrocolloid Wound Dressing

*Hydrocolloid Wound Dressing*

### Hydrocolloid Wound Dressing

**Item No.:** DM4907

• Hydrocolloid wound dressing is made of a wound contact layer of hydrocolloids and a top layer of either semi-permeable polyurethane film or polyurethane foam. On contact with wound surface, the hydrocolloid wound dressings create a moist environment, which can reduce pain, promote the formation of granulating tissue, prohibit bacteria infection and speed up the healing process.

**Product Characteristic:**

- The hydrocolloid adhesive is skin friendly.
- When interacted with skin moisture, the hydrocolloid adhesive provides a secure sealing on the wound edge.
- The rounded corner design prevents the dressing from rolling and self adhesion.
- High absorption capacity for wound fluid.
- Good healing efficacy for light to medium exuding wounds and leg ulcers.
- Ease of application.
- Semi-transparent nature makes it easy to observe progress in wound healing.
- Various different sizes for different wounds on different body locations.

**Product Indication:**

- Can be used to control skin ulcer, leg ulcer and pressure sores.
- Light abrasion wounds.
- Second degree burn wounds.
- Necrotic wound.
- The bordered and standard products are mainly used on light medium exuding pressure sores and leg ulcers.
- The thin products are mainly used on dry to light exuding superficial wounds, surgical post operative wounds and abrasions. It is also used on small wounds towards the end of healing phase.

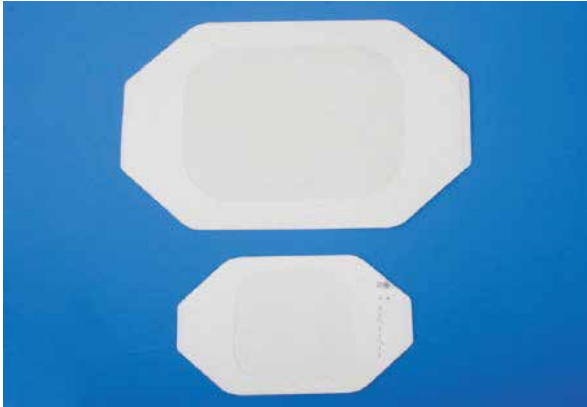

**Dressing procedure:**

- Irrigate / clean the wound with sterile isotonic saline solution or sterile water.
- Gently dry the surrounding skin and ensure that it is free of any residue.
- Choose the size and shape of dressing which is most suitable. It should extend 1.5 to 2.0cm beyond the wound margin.
- Remove the large part of the protective paper from the dressing.
- Apply the exposed part of the dressing, centering it over the wound bed.
- Then remove the small part of the protective paper from the dressing and apply it.
- Finalize application of the dressing, making absolutely sure that the edges of the dressing adhere well.

**Other important issue:**

- The dressing is sterile and disposable, do not use product with damaged package.
- Change dressing immediately in case of leakage edge of the dressing.
- Use the dressing for a maximum of days, change dressing when full absorption is reached.
- The dressing should not be used other than for those wound indicated in "Product indication".
- **Size:** 5x5cm, 10x10cm, etc.
